I love these girlsVon Dell WalkerI have read the entire Thaumatology series and can and will give this same review to all and every one off them.This series is great. Magic, murder, demons, elves, sex and a bit of SM, what more could a fantasy fan want?Give us more Niall0 von 1 Kunden fanden die folgende Rezension hilfreich. verschenktes PotentialVon Eva WinterhollerDie Sterne hat der Autor hauptsächlich durch das Potential der Geschichte verdient. Die Grundhandlung ist wirklich spannend und vor allem neu.Allerdings wre ich deutlich glcklicher, wenn nicht auf jeder Seite das Thema Sex aufkommen wrde und ja, ich stimme dem Vorposter zu, dass die Vergewaltigung absolut unntig war, auch wenn sie in einem halben Absatz abgehandelt wurde. Anscheinend wollte er die Heldung "leiden" lassen, aber ohne Folgen und das scheint bei Autoren eine beliebte Methode zu sein. Vllig unrealistisch, wie ihm vermutlich jeder mit gesundem Menschenverstand sagen knnte, und abstossend.Falls natrlich jemand nur eine sexy Geschichte lesen mcht, die nicht ins pornographische abschweift und solche Fehlritte berspringen mag... nur zu. Das knnte genau das richtige sein.Ich werde mir allerdings noch berlegen, ob ich Band 3 hole. Wie gesagt, die GESCHICHTE gefllt mir. Nur das Drumherum nicht.

KurzbeschreibungA PhD thesis on the metaphysical change process of were-creatures, what could possibly go wrong with that? Ceridwyn Brent, thaumatologist and sorceress, figured it was just a matter of getting a few friends together, putting them in the middle of a scanning thaumometer rig, collating the results, and writing it all up. No muss, no fuss. She even has one of the rare South American were-creatures to work with, and exciting new insight into the process to write up. Her doctorate is a shoe-in and her personal life with Lily, her half-succubus pet has never been better. But something is going on among the werewolves. Dane, leader of the North Hills pack, believes that an old menace is returning to Britain. Alexandra, the enigmatic Alpha of the Battersea pack believes that Ceri is the only person who can stop that menace from doing something which will threaten mankind as well as the wolf packs. When werewolves across the country suddenly go to war with each other, Ceri and Lily have to go to war themselves to save their new friends, and Ceri must find The Fair One before the Winter Solstice. For then, beneath the Demons Moon, the fate of all werewolves will be decided.KurzbeschreibungA PhD thesis on the metaphysical change process of were-creatures, what could possibly go wrong with that?
