KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Nice bookVon Erik Wassermannnettes Buch, sehr kurzweilig und wirklich interessant prsntiert. Handlung wird nur ber emails/Briefe der einzelnen Akteure erzahlt, liest sich trotzdem sehr flssig.

Kurzbeschreibung Jack Olsen is a conscientious worker, a reporter for the New York Times, just after the melting of the polar ice caps. In 2030, Jack answers a message on his computer from Alyadille, who says it is writing from the fifth planet orbiting the star Eta Bootes. This answer is the start of Jack's great adventures. He finds love and professional rewards as he researches the information Alyadille asks for and uses information it sends. Other members of his family get involved with Alyadille and its problems, and Jack himself becomes a Principal Investigator in a project to validate a scientific paper sent by the Senior Scientist on V Eta Bootes. Is this entity real or is he just a "kook in Omaha" playing a joke on America's most distinguished academic researchers? Jack spends many years not knowing the truth, but between 2030 and 2048 he assumes the entity exists and needs his help to save its old and scientifically advanced civilization. Then, in 2048, the entities from V Eta Bootes land in America.
