Von Volker Barthe enjoyed reading this story about a women book club and how a certain book changed their lives. although i think that the last part of the book was to much of pure fiction or fantasy. it was not necessary to pack all kinds of sexual doings in the last part of the book. but all in all i loved reading the story.

KurzbeschreibungWith the choice of Renee Bestow's autobiography 'The New Sexuality' as their club's book of the month, seven friends set off on an unimaginably exciting and challenging journey into their own sexuality. These well-off suburban housewives soon find themselves in a sexual wonderland of their own making as they discover the newly-found freedom that the safety of their group offers them. Whether exploring their own bodies in a session of mutual self-pleasure or enticing their mates to join them in furthering their sexual boundaries, they all come to realize that their sexuality is something that can be shared with each other in ways they had never imagined. Their sexual liberation climaxes with a Labor Day party which proves to be a summer's evening that neither they nor they mates will ever forget.
