**Von Elena Greene : Lord Langdon's Kiss (English Edition)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Lord Langdon's Kiss (English Edition):

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich.  
Traditional RegencyVon John WhelanElena Greene's first book. Her heroine is practical. As the parson's daughter it is quite unlikely that she will ever get another offer as good as the one she has from the Earl of Langdon's younger brother. However although he is charming she still has some doubts about him.Set in the country, Nell, as parson's

daughter, spends time sorting out the villagers, looking after the sick etc. There were some nice gentle touches in the book. Problems got resolved, not always melodramatically, but resolved never the less. I look forward to her next book, it will be difficult to reach the same standard as the first. From the dust cover of the Zebra paperback edition...The Imperious Peer James Mayland, the earl of Langdon, is horrified when he discovers that his feckless younger brother is betrothed to Nell Ashley from the vicarage. He's certain that Nell, who only has a meager dowry is a fortune hunter: Now to save his brother from a loveless marriage, Langdon plans on enticing this fetching miss into a com-promising situation-with himself! But one ardent kiss teaches the distrustful lord that, far from blunting Cupid's arrow, he has deflected it deep into his own wary heart...The Parson's Darling Daughter Nell is quite shocked and dismayed when the earl's studied aloofness seems to melt every time she is near! She can scarcely wonder; though, at her own elated response-since her fondness for his brother falls some-thing short of grand amour And when James's continued attentions lead to passionate kisses, she finds herself caught in a most devilish dilemma...0 von 0 Kunden fanden die folgende Rezension hilfreich. Endless drivel of a regency Von Annie I thought this book would never end...What a silly story about people I could care less about. James Mayland, our hero, is a drip. Nell, our heroine, is sanctimonious, homely and boring. James' brother, Darcy, is found kissing James' fiancée after he had proposed to Nell and was waiting for her answer. He says, well, sorry. That is supposed to be okay? James really love Nell, Nell really loves James, Darcy loves James' fiancée, Constance, Constance loves Darcy. It gave me a headache and this book was not in the least amusing. I never even smiled once while reading it! What a waste. 0 von 0 Kunden fanden die folgende Rezension hilfreich. Lord Langdon's Kiss Von Affaire de Coeur Vicar's daughter Nell Ashley has fallen in love with Darcy Mayland, and he loves her too. Her characters are vibrant, and her prose shows signs of brilliance. The second half of the story slows down considerably, great things are ahead for Elena Greene. END

Kurzbeschreibung Lord Langdon returns from war to find his family in debt and his brother courting Nell Ashley, a country miss he suspects of social climbing. He tries to expose her scheme by luring her to pursue him instead. His kiss incenses Nell, who's already angry with him for neglecting his people. As they learn from their mistakes, they create a tangle of hearts that only true love can unravel. LORD LANGDONS KISS was award-winning author Elena Greenes debut novel. Originally published through Zebra Books, it is a sweet, traditional Regency romance. Sensuality: kisses.
